This text document is to be stored as a pdf file uploaded to the Community Texts archive at archive.org and a link to this file will be included in a post by Steve Myall's in his blog Western Fiction Review. The text is to be accompanied by 22 plates of cover scans from all Slocum and Slocum Giant books available to the authors, including foreign editions. The plates will be uploaded to the Community Texts archive at archive.org with a link to be posted by Steve Myall.

INTRODUCTION

Slocum became the first American western paperback series marketed under the label "adult western" when started by Playboy Press in 1975. It was soon to be followed by lots of series within the same subgenre (see Paul Bishop 2019: Sex and six guns. *Hot Lead* 3:12-27). Slocum also became one of the most long-running US series of western novels, to be ended by book #430 in 2014. Officially written by the house name Jake Logan, "the hottest best-selling western author since Louis L'Amour", the stories were the work of at least 34 different physical western writers. After that in 1982 Putnam & Berkley bought Playboy Press, Slocum continued to be published first under the Berkley (books #50-195), and later the Jove imprint (books #196-430), and including also a set of 17 Slocum Giants. In 1996, Putnam was bought by the Penguin Group that thus became Slocum's final publisher.

Playboy Press's way of handling the transition from using only inventory identifying numbers on their books, to adding also serial book numbers, has caused much confusion related to the publication sequence of Slocum titles. By giving new book serial numbers to both new titles and reprints of books first published without numbers, the publisher opened up for various interpretations of the publication sequence. Consequently, book serial numbers and title numbers got unsynchronized, and the first Berkley book having #50 printed on it, actually was title number forty in the sequence. In the end, 420 Slocum and 17 Slocum Giant titles adds up to 437 unique stories of novel length about John Slocum being published over a period of forty years. Publication of new Slocum titles was initially on a bi- or trimonthly basis, and subsequently raised to monthly under the Berkley and Jove imprints, whereas new Giant titles were made available more on an annual basis. When the Giant editions first came out, they were published in month order with the regular editions, but from Slocum Giant #4 they were published in addition to the regular books.

Starting in 1977, some Slocum titles appeared in British editions, and translated editions were published in at least four other European countries. The highest number of translated titles was published in Norway, with twelve titles in their own subseries. The original US editions are frequently on sale at eBay and other bookselling sites, and book #226 and upwards are available as eBooks. A budget alternative is to borrow them electronically from Open Library at archive.org.

According to the front cover blurb on the 5th book, *The Comanche's Woman*, the story was "Soon to be a major motion picture". Seems this never did happen and as far as we know no Slocum story was ever filmed.

Playboy Press had Barton Jenner producing the cover art, whereas in the Jove editions from 2007 and onwards credit was given to Sergio Giovine. Jenner's paintings were used also on the Norwegian

editions, whereas the British NEL editions had their own cover art by Colin Andrews. The German and Swedish editions used more general cover paintings, chiefly of Spanish origin.

The best way to get to know the many faces of John Slocum is to read all the stories written about him. We here can only provide a small hint using the following short citation from book #417, *Slocum and the Long Ride*, found in the Kindle sample where Slocum is about to rescue the schoolmarm from the raiding Apache warriors:

"Who are you?" she asked behind his ear as the pony caught his gait again.

"Folks call me Slocum."

"Where do you live?"

"Where I sleep."

"You have no home."

"Nope – no home, no woman – nothing but what you can see on this worn-out horse."

"You're a drifter?"

"You might say that. I've spent lots of my time figuring out how to stay alive in this world."

"Are you wanted?"

"Good question."

LIST OF TITLES, EDITIONS AND PRINTINGS

In the following list, titles are listed in their supposed order of publication. As this order for all titles except #26-28 differs from the serial numbers printed on the front covers, these are also given if present (after the slash). Numbers within brackets are assumed rather than read from the books. The difference between the title sequence of publication and the printed book serial numbers was caused by Playboy Press after 1980 giving new serial numbers to both new titles and reprints. As the Slocum Giant series did not use book serial numbers, only the publication sequence numbers are here used when listing them.

The first publication sequence of the titles is based chiefly on three sources of information taken from the books: (1) printing dates, (2) book serial numbers, and (3) inventory identifier running numbers. Printing dates are here viewed as most important as they are directly related to time. Initially, Playboy used only copyright year in their books, but printing year and month may be extracted from later printings of a specific title. The Berkley and Jove editions all came with printing year and month. Book serial numbers on first printings were introduced by Playboy on their book #26 *Slocum's Rage* and present on all subsequent first printings. They normally are congruent with the printing dates, although Playboy's habit to mix new titles and reprints in their numbering scheme did put title sequence and the book serial numbers out of sync. The inventory identifier numbers were used by Bishop (2019) to find the correct publication order of the two first Slocum titles. Although agreeing on his conclusion, a comparison between these numbers and the book serial numbers and printing dates over the entire series show them not to be fully reliable as evidence of the chronological order of the publication of titles. Some stronger evidence is in this case that the Berkley 1987 edition of *Ride, Slocum, Ride* has the following front cover blurb: "First in the exciting series!"

ISBN codes were not printed on the copyright page until 1978 in the Playboy editions. The inventory identifier numbers on the earlier books were, however, continuous with the corresponding numbers

of the ISBN codes. From 2007 and onwards Jove did give only the 13-digits ISBN codes on the copyright page. In spite of this, we have chosen to give the 9-digit codes for all books.

From the start, Playboy printed the inventory identifier number on the front cover, and in 1981 added also the book serial number. Berkley replaced the inventory identifier number with the full ISBN code, first maintaining the vertical upper left position, but on books #141-146 moving it to top horizontal position, and removing it after book #192. The Jove editions's front covers carried only the book serial numbers, in top center position.

Whereas Playboy reprinted almost all of their Slocum titles, Berkley reprinted some of the Playboy titles and a limited selection of their own titles, all before 1988. No Jove reprints are known. Reprints are of different kinds. They all differ from the originals in their printing date, often also in their ISBN code, cover art, or book serial number. The 2nd printing of the first Berkley title, *Slocum's Drive*, book #50, is the only one seen that differs only in the printing date; March instead of February 1983. All other reprints seen differ also in their inventory identifying numbers or ISBN codes. There are ten Playboy reprints with new book serial numbers on their front covers. Many of the Playboy titles published before 1979 did get new cover art on the reprints published three or four years after the first printing. In 1979 Playboy did, not without exceptions, move the inventory identifier number on the front cover, from the upper right to the upper left, which in some cases will ease the separation of a cover scan of a reprint from a first printing. The numbering of printings used in the list is arbitrary as many printings remain unknown to us and only a selection of copyright pages were seen.

Based on various sources of information, the name of the supposed real author of each individual title is given together with the name of the main female character appearing in the story. The here suggested author identities, all writing under the house name Jake Logan, chiefly origin indirectly from the US Copyright Department, a pseudonym researcher, plus a number of separate internet posts. We also thank James Reasoner for valuable help in assigning authors to titles.

The name of one, or rarely two or more, of the main female characters of the story is included in order to represent the identity of the story, being the only information not taken from book metadata. In many cases the name chosen is that of the woman that Slocum says goodbye to on the last page. Almost all main female characters are unique for the story they appear in, one exception being Samantha in Jove books #365 and 366, both written by Ellen Recknor. The same author also did focus on Maddie O'Hara in both the 4th and 5th Slocum Giant books.

Page numbers refer to the last page of the story, paginated or not. One could assume that all Playboy reprints of the same title have the same number of pages, being printed from the same typeset, whereas the Berkley edition of the same title may have a different number of pages. Confusion may arise from Berkley's habit to add excerpts from some of their other western books at the end of their Slocum books. Titles used twice are separated by the addition of Roman numeral I or II.

Foreign editions are known from the following countries: (DE) Germany, (ES) Spain, (NO) Norway, (SE) Sweden, and (UK) United Kingdom.
